

PHOTOGRAPHY COURSES

Basic Photography

Move beyond auto mode and truly understand your camera.

Perfect for beginners and photography enthusiasts who want to unlock their creative potential.

"From Auto to Manual – Capture Moments Like a Pro"

Do you own a DSLR camera but still keep it on "auto" mode because manual settings feel confusing? Have you ever taken a photo that looked nothing like what you saw with your own eyes? You are not alone — and that is exactly why this course exists.

This course is perfect for beginners and photography enthusiasts who want to move beyond auto mode and truly understand their camera. Whether you use a DSLR or a point-and-shoot camera, this program helps you unlock your creative potential and take photos you are genuinely proud of.

You will learn how to take full control of camera settings, understand the fundamentals of composition, and enhance your images through basic post-processing techniques. With a blend of theory, hands-on practice, and personalized feedback, this course ensures a practical and engaging learning experience from day one.

Why Choose This Course

Learn to use your camera in manual mode

Stop relying on auto settings. Understand exactly what each setting does and how to control it yourself.

Understand composition for better photos

Learn the rules and techniques that make a photo visually appealing and interesting to look at.

Get hands-on practice with expert guidance

Improve creativity and storytelling

Learning by doing — practice real shoots with an experienced trainer giving you direct feedback.

Go beyond technical skills and learn how to tell a story and express your creativity through images.

Personalized feedback in small batches

Small group sizes mean you get individual attention and feedback tailored to your specific photos.

Build a strong photography foundation

Everything you learn here becomes the base for any future photography style you want to explore.

Module Outline

1 Getting started — using a DSLR for the first time

If you have never handled a DSLR before, this module gets you comfortable with holding, handling, and navigating your camera with confidence.

2 Camera basics — types of cameras

Learn about the different types of cameras available — DSLR, mirrorless, point-and-shoot — and understand how each one works.

3 Choosing equipment — selecting the right camera

Confused about which camera or lens to buy? This module helps you understand what equipment actually suits your needs and budget.

4 Camera control — moving from auto to manual mode

This is where the real learning begins. Step by step, you will move away from auto mode and start controlling your camera fully yourself.

5 Exposure basics — understanding light and settings

Learn the exposure triangle — aperture, shutter speed, and ISO — and how these three settings work together to control light in your photos.

6 Composition skills — framing and visual storytelling

Learn proven composition techniques like the rule of thirds, leading lines, and framing to make every photo more visually appealing.

7 Creative techniques — capturing impactful shots

Go beyond the basics and learn creative techniques to capture striking, memorable, and emotionally powerful photographs.

8 Post processing — enhancing images

Learn basic editing techniques to enhance your photos after the shoot — adjusting light, color, and detail without overdoing it.

9

Practical sessions — hands-on practice and feedback

Apply everything you have learned in real photo shoots, with your trainer giving you personalized, constructive feedback on your work.

What You Will Be Able To Do After This Course

✓ Shoot confidently in full manual mode

✓ Understand aperture, shutter speed, and ISO

✓ Compose visually striking photographs

✓ Choose the right camera and equipment

✓ Edit and enhance your photos professionally

✓ Capture creative, story-driven images

✓ Understand light and how it affects photos

✓ Build a strong, lasting photography foundation

Who Is This Course For?

Complete beginners

Anyone who just bought a camera and wants to learn from scratch.

Hobbyists and enthusiasts

People who enjoy photography and want to take their skills to the next level.

Aspiring photographers

Anyone considering photography as a serious hobby or future career path.

Frequently Asked Questions

Do I need to own a DSLR camera to join this course?

It is recommended to have access to a DSLR or mirrorless camera with manual settings, since the course focuses heavily on hands-on practice. Contact us if you need guidance on equipment before joining.

I am a complete beginner with zero knowledge. Is that okay?

Yes, absolutely! This course is designed specifically for beginners. We start from the very basics, like how to hold your camera, and build up your skills step by step.

Will I learn photo editing as well?

Yes, the course includes a module on basic post-processing, where you will learn simple editing techniques to enhance your photos after you take them.

How are the practical sessions conducted?

Practical sessions are conducted in small batches so every student gets personalized guidance and feedback. Contact us at 9036111000 for current batch timings and details.
